Used symbols:

In the user manual the following symbols are used:

Warning

This symbol is used for security references, that applies to points that can lead to risk of damages is not followed.

Reference

This symbol applies to a reference as to how the product should be used.

2.1 Security – General references

Make sure that this user manual is read by all persons using the ramp. Damages, caused by the fact that the user manual has not been followed, will not be accepted.

Limitations for usage

- SF-Ramps must not be loaded with more than 300 kg.
- The ramps can maximum be used at inclinations like:

SF-090	20 cm
SF-120	25 cm
SF-150	30 cm

Danger for accidents

- Only use the ramp for the purpose it is intended for.
- Only use ramps in good technical condition.
- Avoid making constructive changes on the ramp, unless you have the producers written accept.
- When unfolding the ramp the user must take care not to squeeze the fingers or other body parts.
- The ramp must only be used on a stable surface.

3 SF-Ramps

Purpose description

Mobilex Ramps are transportable ramps intended to move patients in wheelchairs or scooters. They enable the passage of elevated points with or without the assistance of a helper (f.ex stairs). Mobilex ramps thereby enables patients, sitting in a wheelchair because of invalidity, to enter of leave a building and thus serving a fundamental need. The ramps can be used as well inside as outside. Alligator ramps of the type SF can maximum be loaded with 300 kg.

4 SF-Ramps

Indication

Mobilex ramps are intended for use by patients that because of invalidity are sitting in a wheelchair. They make it possible for the patients to pass elevated points with or without the assistance of a helper.

Alligator ramps type SF can for be folded for transport and locked with a hinge.

10 SF-Ramps

Technical data

Alligator Type SF-090	
Lenght:	90 cm
Width:	80 cm
Surface:	76 cm
Height of sideprotections:	Outer protection: 6 cm
Max. elevation / Height difference:	12° / 20 cm
Weight total:	8 kg
Max. load:	300 kg
Remarks:	

Alligator Type SF-120	
Lenght:	120 cm
Width:	80 cm
Surface:	76 cm
Height of sideprotections:	Outer protection: 6 cm
Max. elevation / Height difference:	12° / 25 cm
Weight total:	10,5 kg
Max. load:	300 kg
Remarks:	

Alligator Type SF-150	
Lenght:	150 cm
Width:	80 cm
Surface:	76 cm
Height of sideprotections:	Outer protection: 6 cm
Max. elevation / Height difference:	12° / 30 cm
Weight total:	12,5 kg
Max. load:	300 kg
Remarks:	

11 SF-Ramps
