SHOPPING TROLLEY

Stylish aluminium shopping trolley with large shopping bag made of tear-resistant nylon. The shopping trolley can be used as a seat when on the move by pressing a large button on the side. When stationary, the wheels are clear of the ground so it cannot roll away when used as a seat. When the Koala shopping trolley is moved across the floor, the trolley's curved structural bars make it easier to negotiate uneven surfaces. The trolley is rustproof and lightweight, yet sturdy and can be loaded with up to 110 kg.

In 2017, the trolley was awarded the Red Dot Award design prize. Statement by the Jury: The integrated seat system and the attention to safety given to the trolley indicate sensitive consideration for the requirements of elderly people.

## Technical specifications

Height unfolded: 960 mm

Seat height: 650 mm

Weight: 2,5 kg

Load capacity bag: 30 kg

Load capacity seat (max. weight of user): 110 kg
